USING TRACE ROUTE

OPEN CMD ---

CD\

tracert www.sncollege.com (IP ADDRESS YOU WILL GET)

tracert(lp address)

this practical is used to find out the MTU

ping

commands

ping (ip address of sn) -l 1500 -n 1

ping (ip address of sn) -l 1500 -n 1 -f

ping (ip address of sn) -l 1478 -n 1 -f

ping (ip address of sn) -l 1474 -n 1 -f

till you get send =4 received =4

tracert using ping

ping sncollege.com -n 1 -i 1

ping sncollege.com -n 1 -i 2 ping sncollege.com -n 1 -i 3 till you got same reply from same ip address

make table

nslookup

commands

nslookup

set type=mx, a ,soa,ns

HTTrack Website Copier

Start> programs>next> click on add url > college website>next>finish>only download first 4 files and stop >mirror website

Smart whois
